

WORD GUESSER

CFG PROJECT

A game by Faizah Malik,
Vanessa Sjoborg, Becky Sorsby,
Zoe Scott, Halyna Maslak

Agenda

What we'll discuss today

01

Objectives

02

Game

03

Development Approach

04

Challenges & Hurdles

05

Potential Features

06

Learning Outcomes

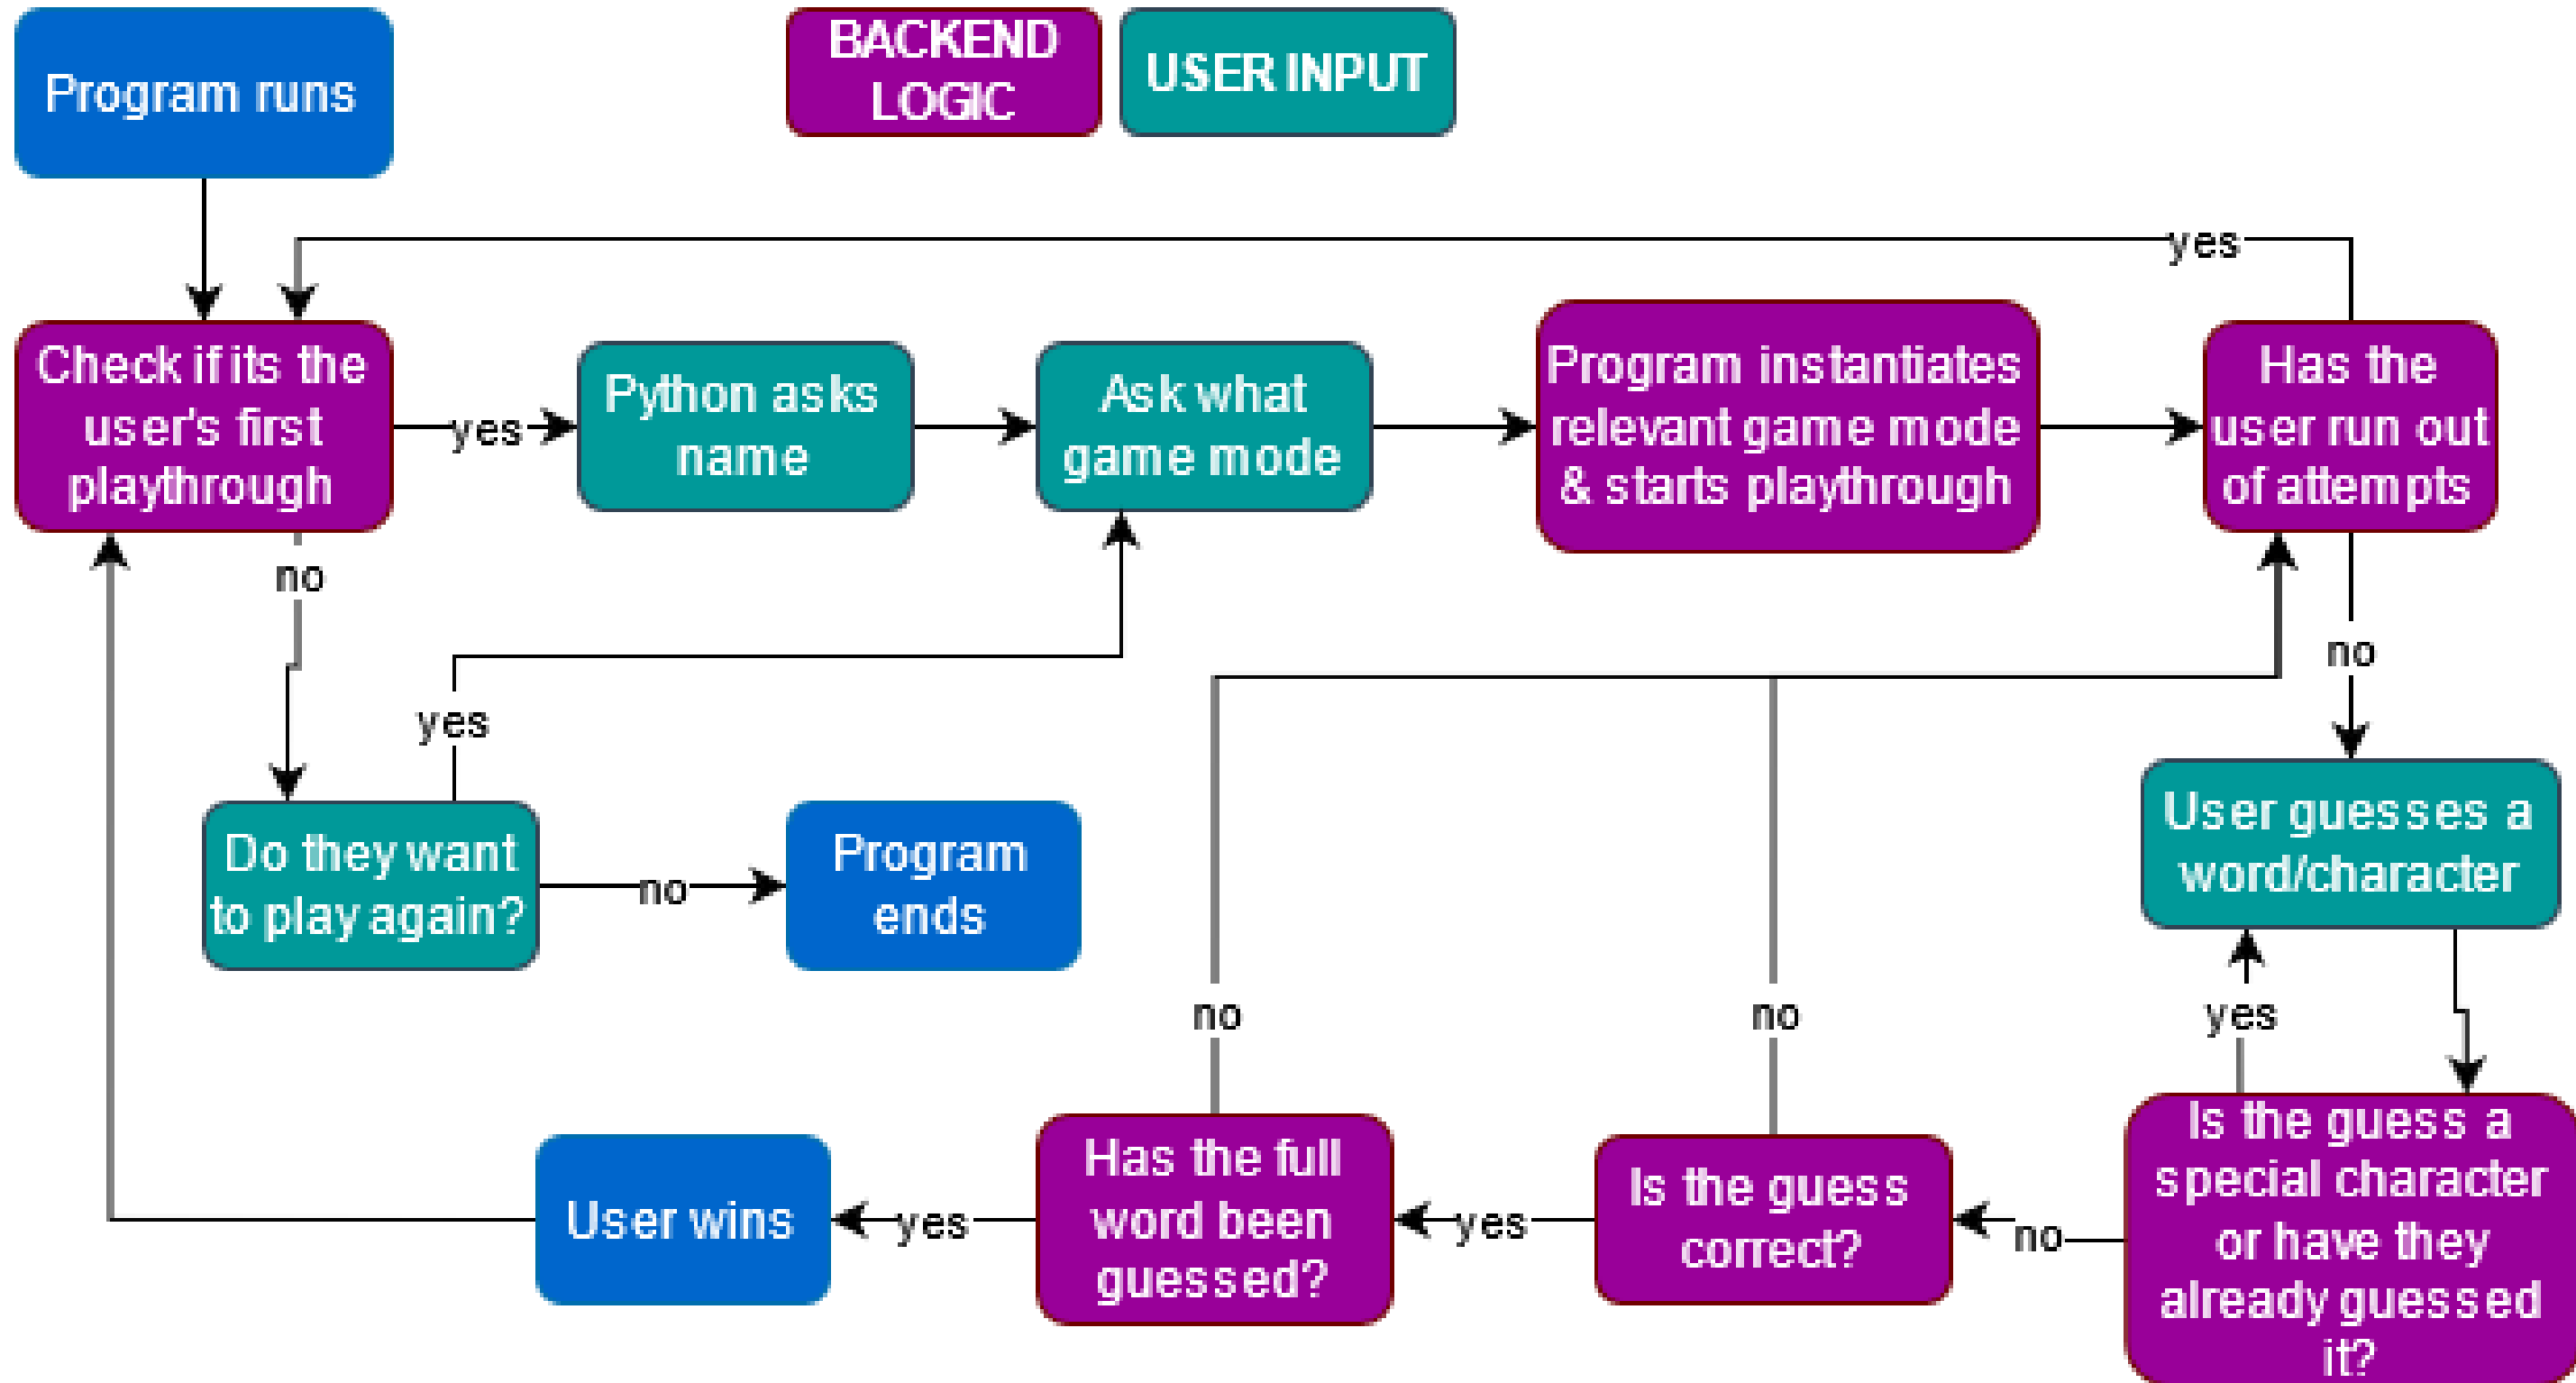

OBJECTIVES

The project must have one of four clear objectives...

- To create a simple algorithm game
- To satisfy a need
- Help people bond and have fun!

LOGIC

🐦 Hangman? Pfffffft never heard of it

6. Now we got a verb with all unique characters:

🐦 Turtle Game

Past Guesses: ['p', 'i', 'e', 'o', 'a', 'n', 's', 'z', 'd']

Enter your guess:

OKCancel

_i_s_a_e

Wrong guess! Attempts left: 4

DEVELOPMENT APPROACH

WORKFLOW

Agile approach (Kanban)
Working to individual strengths

INDIVIDUAL SKILLS

- Halyna – NLTK
- Becky – Turtle
- Faizah – Code structure & OOP
- Zoe – Organisational skills
- Vanessa – Testing, Organisation, Code Structure

CHALLENGES

The hurdles we had to overcome

Too many good ideas!

It's easy to get lost so we learned to prioritise! e.g. picking Turtle over Telegram

Time management

First achieved a clear MVP. Then added features on a rolling basis.

Speed issues

Optimised code and reduced loading speed from 10s to 0.008s

POTENTIAL FEATURES

- Database of users & scores
- Story mode
- Use Pygame/Tkinter for a better GUI
- Different languages
- Categories (e.g. Pokemon, Movie titles, Subjects)

WHAT WE LEARNED

- Time-management & Prioritisation
- Importance of communication
- Problem-solving & Debugging
- The more code we wrote, the better we got

THANK YOU

**Thanks for listening.
Any questions?**

**How many turtles did
you see?!**

Faizah Malik,
Vanessa Sjoborg,
Becky Sorsby,
Zoe Scott,
Halyna Maslak
